PROJECT NAME: THE ROYAL TANK MUSEUM
SERVICE TYPE: DESIGN & SUPERVISION
CLIENT: ROYAL JORDANIAN COURT
DESIGN: STEALTHY SAND CASTLE
BLDG TYPE: STEEL STRUCTURE
CLADDING: ALUMINUM
COMPLETED IN 2019
AREA = 200,00 S.F

ROYAL TANK MUSEUM

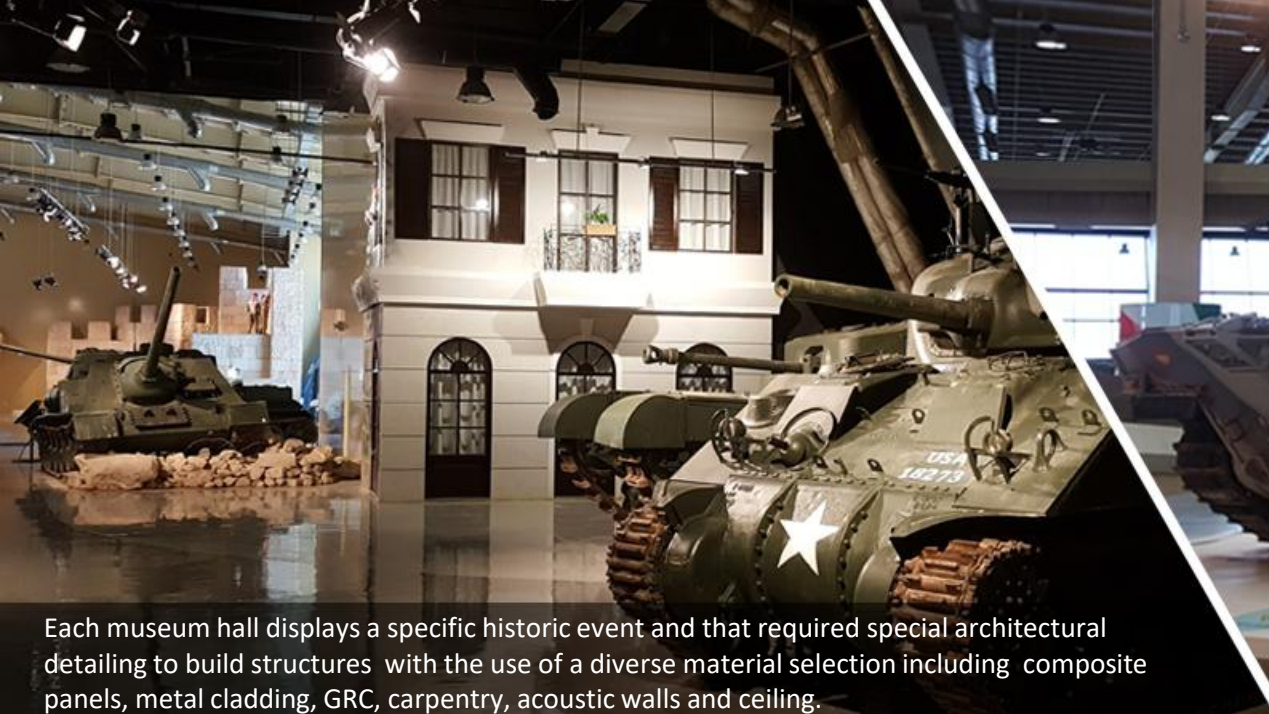

The Royal Tank Museum presented an undeniably complex yet thrilling challenge, that of which is composed of planning, designing and constructing a new national monument dedicated to presenting historical Events that have shaped the very character of Jordan. Architecturally, it rivals all major artillery museums worldwide while evolving into an iconic entity that depicts Jordan's military history.

The architectural design of the museum is expressed with subtle metaphors in a contemporary visually stimulating building. The museum is in the form a futuristic sand castle fortress that borrows from the language of STEALTH.

Daoud was responsible for all architectural design and supervision of the museum's main building , interior design, display arrangement and the adjacent park.

Each museum hall displays a specific historic event and that required special architectural detailing to build structures with the use of a diverse material selection including composite panels, metal cladding, GRC, carpentry, acoustic walls and ceiling.
